PROFESSIONAL SUMMARY

Civil Engineer in Computer Science from Universidad Austral de Chile and Software Engineer with professional experience in full-stack development, working primarily with TypeScript, Next.js, NestJS, Python, and PostgreSQL.

I have contributed to the development and evolution of multiple products, from maintaining and extending existing systems to building new solutions end-to-end across frontend, backend, integrations, automation, and large-scale data processing. I also have experience working on AI-related products and aim to continue growing in backend engineering, scalable systems, software architecture, and applied AI.

PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER | SEICHO

MARCH 2026 – PRESENT

- Develop and evolve full-stack solutions with Next.js, NestJS, and TypeScript across multiple products and business domains, working on both new development and existing systems.
- Onboard into existing codebases to analyze legacy systems, troubleshoot issues, refactor components, and implement new features across frontend, backend, and business logic.
- Developed a raffle platform almost end-to-end, implementing frontend and backend functionality from requirements through client demo, while gaining hands-on exposure to deployment workflows with Fly.io.
- Contributed to a proof of concept for high-volume professional fee receipt generation and processing, working with millions of records processed in approximately two hours and addressing large-scale performance challenges.
- Develop and maintain integrations and automation for tax-related workflows, including data extraction from Chilean tax authority (SII) systems, document processing, invoicing, and expense-reporting flows.
- Work directly with clients through requirements gathering, product demos, feature validation, and refinement, contributing to technical decisions and product evolution based on feedback.

SOFTWARE ENGINEER - AI TEAM (TRAINEE) | NOTCO

AUG 2025 – MARCH 2026

- Develop and maintain full-stack features using Vue.js, Nuxt, and FastAPI.
- Contribute to AI-driven products within the food-tech industry.
- Implement and improve CI/CD pipelines using GitHub Actions and Docker.
- Participate in architectural discussions, code reviews, and technical documentation.
- Collaborate within a multidisciplinary Tech team in an agile environment.

FULL STACK DEVELOPER - FINAL DEGREE PROJECT

SEP 2024 – FEB 2025

- Designed and implemented a full-stack Progressive Web Application (PWA).
- Built backend services using Node.js and containerized the application with Docker.
- Developed frontend with React and TypeScript following modular architecture principles.

INNOVATION AND DEVELOPMENT INTERN | GRUPO SAESA

JAN 2024 – MAR 2024

- Collaborated within a multidisciplinary innovation team.
- Automated engineering processes using Excel and VBA, reducing manual workload and minimizing repetitive errors.

SOFTWARE DEVELOPMENT INTERN | SOPHIA TECHNOLOGIES

MAR 2023 – JUL 2023

- Developed Python scripts to generate structured PDF reports with dynamic tables for a regional government client.
- Automated data processing workflows to improve reporting efficiency.

TECHNICAL SKILLS

Programming Languages

TypeScript, JavaScript, Python, SQL

Frameworks & Technologies

Next.js, NestJS, React, Node.js, FastAPI, Vue.js, Nuxt

DevOps & Tools

Docker, GitHub Actions, Fly.io, Git, GitHub, Claude, Cursor

Databases

PostgreSQL

EDUCATION

CIVIL ENGINEER IN COMPUTER SCIENCE | UNIVERSIDAD AUSTRAL DE CHILE

2017 – 2025

LANGUAGES

- Spanish – Native
- English – C1 (EF SET [Certified](#))
